Now you can offer everything your customer needs for entertainment on the run! The A/V GAME PREP KIT gives your customer an easy to use, safe and reliable method of hooking up their favorite video game system.

Compatible with all video games, there is no need for special adapters/accessories to use your home video game in an automotive vehicle.

This Prep Kit is compatible with stereo or mono. It can be installed for either configuration.

In addition to video games there are many more uses for this A/V prep kit with power interface. You can now use it to preview your camcorder, power your portable DVD player, or a portable cd player.

Any device that has audio and/or video connections can now be connected and enjoyed in your mobile environment.

Optional N64 only Power Supply available
