## AUXILLIARY REAR FAN KIT

Introducing our new line of +12V switched Intelligent Relay Modules for Astro/Safari van chassis.

These relay modules will allow you to add a secondary slave controller (selector switch) in the mid-section or rear of the vehicle, which will interface with the Factory in-dash rear fan control switch.

This unit is built to meet automotive standards, with sealed relays, and positive locking Amp mate & lock connectors.

We can offer the complete assembly with fan switch panel or the module by itself.

Call us today with your specific application.
