

# Look at American Technology... See the Difference.

## LARGE BUTTON 12VOLT LIGHT DIMMER

These new Euro styled push button light dimmers will soon be the benchmark in which contemporary high performance, solid state dimmers function and perform.

With a rating of 12.5 Amps these 12 VDC dimmers are built to "carry the load" for years of reliable light adjustment control.

The electronics are designed to function in extreme temperature variations and are protected against voltage differences and voltage spikes.

This low profile unit is available in both white or black to manage your decor!

Options include:

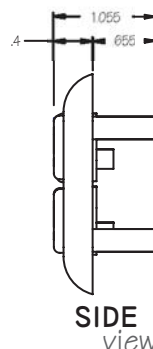

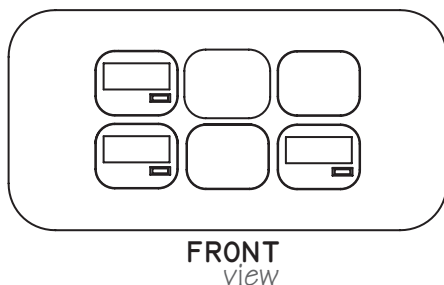

- White or black panel.
- Two button with no on/off.
- Three button with power switch (as shown).
