The 7000 Switch System utilizes the same new large button switch controls as our popular System 6000 but offers additional features and expanded capabilities.

Applications include:

Van conversions, Utility Trucks, Specialty Vehicles, Recreational Vehicles, and more.

Features include:

- Up to "6" switched circuits.
- Multiple switch panel locations.
- Low battery protection.
- Dual Function Sofa operation.
- Sofa Current Sensing.
- Courtesy delay circuit.
- RJ11 Communication Cable connectors.
- 1 fused courtesy output.
- 2 fused ignition outputs.
- 2 fused battery outputs.
- 6 fused "switched" outputs.

Outputs 1 through 4 can be programed to remain "on" for 20 minutes after ignition is turned off.

The sofa funtion can be activated with either a low current rocker switch or electronic switches.
